

vifraIntegra®
Healthy&Natural

What it is?

ProLife is a natural supplement for the old age, which helps slow down the aging process. Thanks to the progress made in medical, economic and social fields, old age, once perceived as period of disability and physical decay, has now become for the majority of the people a phase of continued productivity, independence and good health. However, it must be taken into account this: how much of the long life we live is really healthy? Natural active ingredients can help us.

An innovative Formula

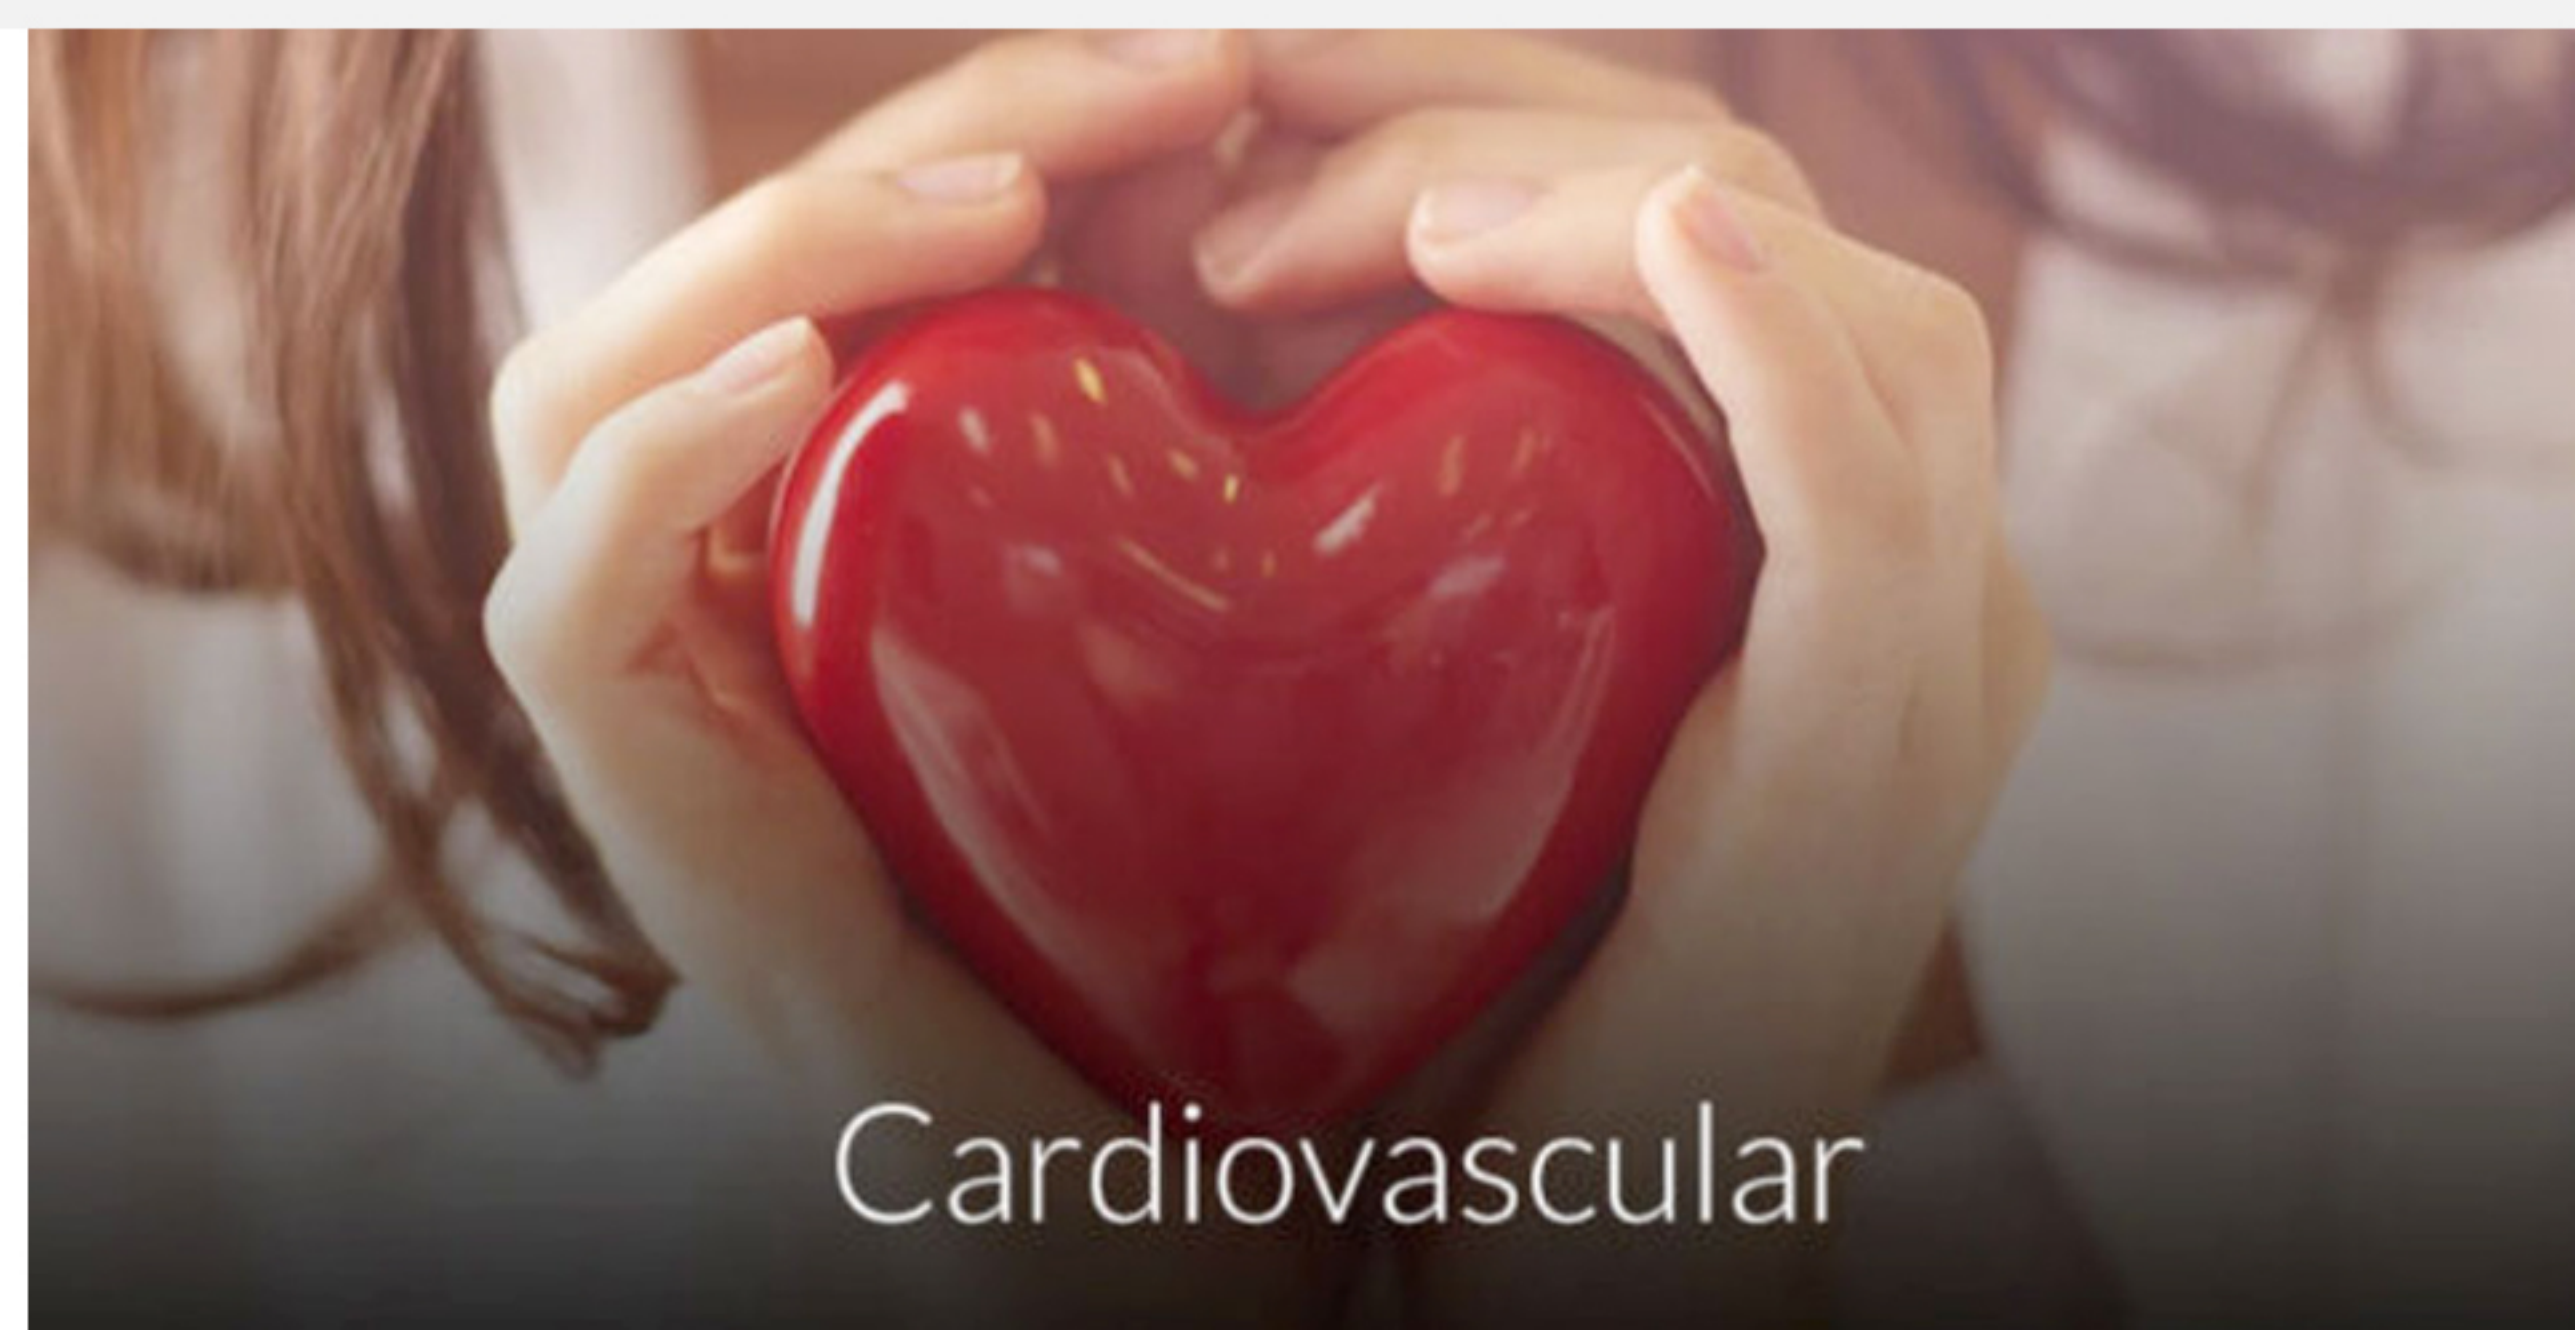

OLEUROPEIN has several pharmacological properties, including antioxidant, anti-inflammatory, antiatherogenic, antitumor, antimicrobial and antiviral ones. Oleuropein potently inhibits according to its dosage the oxidation of low-density lipoproteins (LDL) induced by copper sulfate. It increases the production of nitric oxide (NO) in macrophages in contact with lipopolysaccharides through activation of the inducible form of the enzyme nitric oxide-synthase, thereby increasing the functional activity of these immune-competent cells.

POMEGRANATE is a powerful antioxidant. This fruit is rich in flavonoids, anthocyanins, punical acid, ellagitannins, alkaloids, fructose, sucrose, glucose, simple organic acids and other components and it has anti-atherogenic, antihypertensive and anti-inflammatory properties. It can be useful in the prevention and treatment of cardiovascular diseases, osteoarthritis, arthritis rheumatoid and other diseases. In addition, it improves wound healing and it is beneficial for the reproductive system.

ZINC, NIACIN and **FOLIC ACID** present in the formula, help to shut down the inflammation process, helping to improve the patient psychophysical condition.

To whom it is recommended

The association of the active ingredients present in **PROLIFE** concretely contributes to improve the oxidative and inflammatory condition of the patient's body and to improve its psychophysical conditions with a fundamental preventive action.
